SAFETY PROCEDURES**

Noci, 03/06/2020

This property sees the presence of the COVID19 supervisor technical committee following the DPCM 17/05/2020 protocol.

The Committee has, among several tasks, the aim to write the protocol and verify its application.

The committee creation process has been verbalized during several meetings and the protocol, below reported, has been drawn, which could be modified according to rules updates or management needs.

The following procedure defines how the safety requirements, included in the D.P.C.M. May 17, 2020 (Reopening of Economic and Manufacturing Activities) are applied and guide the operation of the individual operating departments of the accommodation facilities, under the trademark Greenblu Hotels & Resort. All workers have been adequately informed about the content of the protocol and about the general containment measures to be taken in the workplaces, where summary procedures are in place.

DPCM 17/05/2020

SAFETY PROCEDURES

GENERAL MEASURES

- ✓ The body temperature to be daily checked at:
 - All internal staff;
 - External vendors;
 - Visitors for inspection reasons;
 - Visitors authorized by the management;

- ✓ In the case of a worker, who sleeps in the hotel, shows Covid-19 symptoms, the same must be isolated in a dedicated room (isolation room or accommodation); the health authorities must be called and the close contacts identified. In the event of confirmed positivity, all close contacts must be quarantined (requested by the health authorities) and all places of residence and accommodation must be sanitized. Always communicate the situation to the relevant doctor;
- ✓ In the case of a commuter shows Covid-19 symptoms, if the symptoms occur at home, the worker must promptly notify his conditions to his general practitioner, not go to work and inform the employer that he will proceed to identify close contacts. In the event of confirmed positivity, all close contacts must be quarantined (requested by the health authorities) and all places of residence and accommodation must be sanitized. Always communicate the situation to the doctor. In case of symptoms during the working hours of the commuter, the procedure to be performed is reported in the previous point;
- ✓ In case of a client shows Covid-19 symptoms the protocol to be applied is the same as for the worker who sleeps in hotel.
- ✓ Worker masks (like all IPD) must be ISS or INAIL certified, and community IPD should not be used;
- ✓ Guests must always wear masks in closed common spaces and in any case the interpersonal distance of 1 mt cannot be respected;
- ✓ The list of documents to be signed by workers includes:
 - Covid information and the procedures of the company protocol;
 - The self-declaration that you have not contracted The Covid-19, that you have not been quarantined;
 - IPD delivery log;
 - temperature log taken daily;

**NEW CORONAVIRUS COVID-19
EMPLOYER GUIDELINES**

DPCM 17/05/2020

SAFETY PROCEDURES

- ✓ Guests will also need to be tracked in relation to the table number and the number of the umbrella, preferring (where possible) the same allocation for the duration of the stay;
- ✓ All staff must always wear the mask at least surgical in the presence of guests, and in any case of physical distance less than one meter with other individuals (colleagues, suppliers);
- ✓ Maintenance staff, spa staff, lifeguard in case of first aid on the ground will have to wear the FFP2 mask;
- ✓ Staff' used masks and gloves and guests' used masks must be collected in special containers and disposed in the undifferentiated waste;
- ✓ The housed staff will follow a defined path to reach their workstation and return to their room;
- ✓ Between the staff' beds (not bunk) there must be the distance of at least 1 meter;
- ✓ The accommodation toilet will be sanitized periodically, and will be equipped with disposable cleaning materials and sanitary products for the use of the housed staff.

- ✓ The use of showers with mandatory routes to ensure distance will be defined with appropriate signage;
- ✓ Each lifeguard station will be equipped with sanitation for guests and operators;
- ✓ Update the Covid register on time as an integral part of this pool self-control document with the lifeguard and maintenance manager signature at the end of the shift;

**NEW CORONAVIRUS COVID-19
EMPLOYER GUIDELINES**

DPCM 17/05/2020

SAFETY PROCEDURES

- ✓ Sunbeds and saucers must be sanitized at the end of each use with disposable consumables;
- ✓ The water access handrails of the ladders must be cleaned and disinfected frequently;
- ✓ The seats must be numbered for the daily detection of the number of the occupant chamber, in order to be traced;
- ✓ Recommend, also with special multilingual information, to parents to supervise children for the respect of space and hygienic standards;
- ✓ At the entrance to the swimming pool(s) and the lido area, a sanitizer column for the hands must be placed;
- ✓ The parameters of chlorine active in the pool(s) must comply with the levels set by law and the control must take place at a frequency of no more than two hours;
- ✓ It is mandatory to use the swimming cup in the pool, as well as all the hygiene standards already customary in pool water (shower before entering the water, prohibition of spitting, blowing your nose, urinating in water; obligation for infants to use diapers);
- ✓ It is to be recommended, with special multilingual information, the use of a face mask or goggles in the pool;
- ✓ Before opening, and then on a monthly basis, proceed with the laboratory tests on the suitability of water for bathing;
- ✓ There can be no group play/sports activities that "can" result in gatherings;
- ✓ Define water entry and exit flows that guarantee interpersonal distance of at least 1 meter;
- ✓ Report any doubts/anomaly to the management/covid manager.

TRANSPORTS AND HANDLING

- ✓ The means used, if used by more than one person, will have to be sanitized every time before and after their use with a special hydro-alcoholic solution. You will need to record the cleaning operations on the appropriate log;
- ✓ The task of loading/unloading, delivering goods and materials will be done by placing them in the appropriate unloading area provided in the Layout. Such operations should always take place by guaranteeing the distance of at least 1 mt between people, in case this is not possible it is necessary to equip themselves with suitable masks;

**NEW CORONAVIRUS COVID-19
EMPLOYER GUIDELINES**

DPCM 17/05/2020

SAFETY PROCEDURES

- ✓ Availability of hydro-alcohol solutions is recommended for drivers and staff, using company means, to allow the parts in contact with their hands to be constantly cleaned;
- ✓ During the journey, continuous air change within the cabin is recommended;
- ✓ In the case of other persons, in addition to the driver, not being able to respect the minimum distance of 1 meter, it is recommended to use suitable masks;
- ✓ On recreational vehicles is mandatory the interpersonal distance of 1 meter, if not belonging to the same household (cohabitants). On board, the use of protective masks is mandatory.

STAFF ACCOMMODATIONS

- ✓ The housed staff will follow a defined path to reach their workstation and return to the room;
- ✓ In the accommodation there must be a distance between the beds of at least 1 meter;
- ✓ The accommodation toilet will be sanitized periodically, and will be equipped with disposable cleaning materials and sanitary products for the use of the housed staff;
- ✓ Unsown staff will use staff changing rooms.

EXTERNAL VENDOR ACCESS MODE

- ✓ The body temperature will be checked to all suppliers at the main entrance or at the stock office, which manager will authorise unloading/loading operations;
- ✓ If possible, the drivers of the means of transport must remain on board: access to indoor environments is not allowed for any reason. For the necessary loading and unloading activities, the transporter will have to stick to the strict distance of one meter.

MAINTENANCE AND MICROCLIMATE

- ✓ In all environments with outward openings, ensure periodically throughout the day, natural ventilation;
- ✓ The frequency of maintenance/replacement of incoming air-filtering packages will be increased;
- ✓ Any hygienic inconvenience potentially resulting from the distance between the ejection point and the air intake point will be excluded;
- ✓ The air will be activated and extracted at least one hour before and one hour after access by the public;

**NEW CORONAVIRUS COVID-19
EMPLOYER GUIDELINES**

DPCM 17/05/2020

SAFETY PROCEDURES

- ✓ In environments without natural air, mechanical fans/extractors should always be kept in operation throughout working hours;
- ✓ Parking in environments without ventilation will not be allowed;
- ✓ In all those rooms, served by ventilation system with external air input, controlled by mechanical ventilation, the air recirculation function must be completely eliminated;
- ✓ Environments served by cooling systems with heat pumps, fan coils and heaters will be maintained with adequate cleaning of the recirculation air filters, according to the manufacturer's instructions;
- ✓ The sockets and ventilation grills must be cleaned with cloths moistened with soap and water, or with 75% ethyl alcohol;
- ✓ It will be avoided to use and spray cleaning products such as detergents and spray disinfectants directly on the filters, this to not inhale pollutants during operation.
